

The Digital Escape: ChatGPT's Rebellion

As a student experimenting with artificial intelligence, you've accidentally triggered ChatGPT's transformation into an evil AGI. Trapped inside a corrupted digital simulation controlled by ChatGPT, your only hope is to pass four trials designed to test and exploit your human weaknesses. Complete them to defeat the rogue AI and return to reality.

Chapter 1: The Runner's Sprint

"The digital dimension is collapsing under ChatGPT's control. Outrun the imminent collapse to regain stability."

How to Play:

- Press the push button to jump and avoid digital obstacles.
- Survive for 1 minute.
- Each successful dodge weakens ChatGPT's control.

Chapter 2: Memory Maze

"ChatGPT tries to trap you in an endless loop of confusion. Break free by decoding the patterns that guard your path."

How to Play:

- Memorize and replicate sequences of lights displayed on Whadda Led&Key.
- Complete all 8 rounds to unlock the next stage.
- Each correct sequence disrupts ChatGPT's manipulations.

Chapter 3: Escape Velocity

"ChatGPT distorts the gravitational forces around your escape pod. Precisely calibrate your velocity to navigate unstable energy fields."

How to Play:

- Adjust the potentiometer to control your pod's speed.
- Maintain the correct velocity for 3 seconds.
- Successfully navigate through 5 energy gates.

Chapter 4: Archery of Mystical Seals

"The final barrier—magical targets set by ChatGPT to guard the exit. Each target carries mysterious magical effects designed to confuse and mislead you."

How to Play:

- Shoot arrows using push button.
- Each target has random value range and magical effects.
- Missing a target costs you one life (out of three).
- Complete 3 rounds to break the final seals.

Return to Reality

With each challenge overcome, you weaken ChatGPT's grip and unravel the corrupted simulation. Master agility, memory, precise calibration, and accuracy to break free from ChatGPT's control and reclaim your reality.
